

Electronic Health Insurance Card

Your eGK – Whenever you go to the doctor, dentist or need hospital treatment, you must present your electronic health insurance card (eGK).

For what can I use the health insurance card?

You need to show the card whenever you visit a doctor, dentist, physician or hospital. The eGK allows doctors to bill their services directly with the health insurance fund. Be informed that each family member you have applied for insurance receives their own electronic health card (eGK).

Why do I need a picture?

The picture allows you to be identified with your electronic health insurance card (eGK) and insures that no unauthorized person uses your card. Children under 15 years don't need a picture yet.

Which data are stored on the card?

Only your name, address, date of birth and your health insurance number are stored on the card.

Do I have to carry the card with me at all times?

Yes! It's imperative to carry the card always with you. The doctor can refuse treatment without presenting the card. Your doctor needs the card for each visit with the aim of settling accounts with your health insurance company.

Send your Passport Photo

After signing the membership application, you'll receive a letter within 3 business days. Please return the letter back with your affix photo. There are a few options to this said letter.

- By post with the enclosed envelope at no cost.
- Via Email lichtbild@bkk-pwc.de after scanning the photo as a JPEG file. Please mention your full name and date of birth.
- Deliver in person at the BKK office.
- By upload on our homepage www.bkk-pwc.de.
